Facebook Awareness Ad - Next Steps

- Re-cut the 2.5-minute demo video into shorter 20–40 second highlights optimized for Reels.
- Run new awareness ads with these cuts to maximize engagement and video views.
- Use Facebook Lead Forms for warm retargeting—auto-fill basic info (name, email)
- On the lead form thank-you screen, send prospects directly to the Calendly demo link (with suggested revised form: only Name, Email, Phone - information pre-filled).
- After booking, collect additional company details (website, role, referral source, “how did you hear”) via a short follow-up intake form or confirmation email.
- Goal: Reduce friction, capture more demo bookings, and still gather all needed qualifying data post-booking.

Facebook Clicked Demo Link Ad Updates

- Replace current static/demo-link creative with shorter 20–40 second clips that clearly show the AI booking a call.
- Optimize campaign for Conversions/Leads instead of reach.
- Send traffic directly to the Calendly demo booking page (simplified form: only Name, Email, Phone - information pre-filled)

After booking, trigger an intake form or confirmation email to collect:

- Company name
- Website
- Role in company
- Referral source / how they heard

For users who click but don't book, retarget them with urgency ads (ex: "Every missed call could be a \$20K mistake" or "We're only onboarding a few contractors per month").

Goal: Convert warm interest into booked demos with less friction, while still capturing full qualification details after the booking.

Pantheon Plan

- Recommend a radius ad at Pantheon to visit your booth
 - Once your booth is setup, we can take pictures/videos of it and use it for ad content
- I will also make a post to visit the booth.
